

## 1. FIRS CONNECTION

- \* Make sure you have the wi-fi enabled on your smartphone.
- \* Open the Inxpect application and the dongle will be detected
- \* Select DNG-WIFI-DONGLE (the name that appears on the screen) and click choose, at this point you will be asked for a password which by default is: **password**

## 2. DONGLE RESET

- \* To restore the default dongle password, connect the cable to the sensor with the RJ connector disconnected from the dongle.
- \* Connect the RJ connector to the appropriate socket of the dongle by holding down the yellow button on the side of the dongle.
- \* The led of the dongle starts to flash, keep the yellow button pressed until the LED comes on steady, at this point release the button
